

WSoftline MRZ Scanner

WSoftline MRZ Scanner is a lightweight and reliable Android application designed to scan and extract ICAO-compliant Machine Readable Zone (MRZ) data directly from passports and ID documents using the device camera.

- Scan Passport & ID MRZ using the phone camera
- Fully offline operation (no internet required)
- Multi-frame burst scanning for higher accuracy
- Automatic MRZ cleanup & normalization
- Extracted and parsed results (structured fields)
- Simple, clean, and professional interface
