

Scango Lite

Barcode Data Collector Application

Scango Lite is a lightweight and powerful **Android barcode scanning application** designed for smartphones.

- Camera-Based Barcode Scanning
- Offline Data Collection
- All scanned data is stored locally on the device — no internet connection required.
- Smart Inventory Sessions
- Collect barcodes during a session, review entries, and manage quantities before saving or exporting.
- Manual Entry & Editing
- Add barcodes manually, edit existing entries, and adjust quantities at any time.
- Duplicate & Quantity Handling
- Each scan is tracked independently with quantity control per item.
